

3M™ High Intensity Prismatic Reflective Sheeting
Series 3930 with Pressure Sensitive Adhesive
Series 334/336 Barricade Sheeting

Bright and Durable

- Excellent choice for FHWA Minimum Retroreflectivity Compliance
- Meets multiple specifications
- Tougher top coat
- Vivid daytime colors
- Improved optical package

3M

One product for several applications

3M™ High Intensity Prismatic Reflective Sheeting Series 3930 with pressure sensitive adhesive is designed for use on durable traffic control signs, work zone signs and delineators. 3M™ High Intensity Prismatic Reflective Sheeting Series 334/336 is available in pre-striped orange and white for all your barricade needs.

- Meets ASTM D4956 Type III, Type IV and Type X specifications.
- Tougher topcoat provides improved scuff, scratch and gouge resistance and increased durability for the demanding need of the work zone.
- Vivid daytime colors provide 24-hour performance with increased daytime visibility.
- The improved optical package increases nighttime visibility.

Better for the environment

Not only is 3M high intensity prismatic sheeting bright and durable, it's better for the environment. The manufacturing process for prismatic sheeting reduces VOC emissions by 97 percent and energy consumption by 72 percent compared to standard engineer grade sheeting processes. Now that's a change for the better.

Contact your 3M Representative Today

As the leader in reflective sheeting technology, 3M can meet your specific sign sheeting needs. To learn more about 3M™ High Intensity Prismatic Sheeting Series 3930 and Barricade Sheeting Series 334/336, contact your 3M representative, call 800-553-1380 or visit www.3M.com/tss.
